

ELAINE LAZO

Junior Software Engineer | Full-Stack Web Developer

Antipolo City, Philippines | +63 967 240 8285 | elainelazo1015@gmail.com

PROFESSIONAL SUMMARY

Junior Software Engineer with 2+ years of professional experience in software development, API integration, and full-stack web development. Primary experience with C# and .NET, with hands-on work across RESTful APIs, SOAP web services, Microsoft SQL Server, HTML, CSS, and JavaScript. Also gained practical experience working with the MERN stack and modern AI coding assistants including ChatGPT, GitHub Copilot, and Claude. Comfortable collaborating with teams, reviewing code, troubleshooting integrations, and delivering maintainable solutions in a payment technology environment.

TECHNICAL SKILLS

Languages: C#, JavaScript, HTML, CSS, SQL, PHP

Frameworks & Development: .NET / ASP.NET, RESTful APIs, SOAP Web Services, ReactJS, MERN Stack, WordPress

Databases: Microsoft SQL Server, Relational Database Management Systems (RDBMS)

Tools: Git, GitHub, Visual Studio, VS Code, Jira, Asana, Canva, Adobe Illustrator, Microsoft PowerPoint, Microsoft Publisher, Figma

AI Development Assistants: ChatGPT, GitHub Copilot, Claude

Design & Web: UI/UX Design, Frontend Web Development, Creative Design, Presentation Design, WordPress Development

PROFESSIONAL EXPERIENCE

Junior Software Engineer — Paynamics Technologies Inc.

November 2023 · May 2026 | Philippines

- Developed and maintained payment and disbursement applications using C# and .NET as the primary technology stack across backend services, APIs, web applications, and back-office tools.
- Developed and integrated RESTful APIs and worked with SOAP web services to support merchant, payment, and system-to-system integrations.
- Contributed to full-stack development using C#, .NET, HTML, CSS, and JavaScript, while also gaining hands-on experience with migration and development using the MERN stack.
- Worked with Microsoft SQL Server and relational databases for application data, queries, and database-related development.
- Used Git for version control, collaborative development, and code review workflows.
- Investigated defects, enhanced existing features, and supported API and system integrations in an Agile development environment.
- Used AI development assistants such as ChatGPT, GitHub Copilot, and Claude to support coding, debugging, documentation, research, and development productivity.

Web Development Intern — Business Sense Group of Companies

January 2023 – June 2023 | Philippines

- Developed and customized WordPress websites using PHP, HTML, CSS, and JavaScript, including content updates and basic website maintenance.
- Created and edited digital materials such as course booklets, brochures, event posters, email flyers, and PowerPoint presentations.
- Used Canva, Adobe Illustrator, Microsoft PowerPoint, and Microsoft Publisher for creative design, layout, presentation, and marketing materials.
- Supported website and content requirements while developing practical experience in frontend web development and visual communication.

Outbound Call Center Agent — Globatel Business Solutions

February 2022 – September 2022 | Part-time

- Worked part-time during the COVID-19 pandemic while completing college studies, making outbound calls to prospective clients to promote products, memberships, and services.

Freelancer — Creative & Web Development

2019 – Present | Freelance

- Create presentation and visual content as a creative designer using Canva and Microsoft PowerPoint, including business presentations and marketing materials.
- Develop UI/UX concepts and interfaces using Figma, with focus on layout, usability, and visual consistency.
- Provide frontend web development using HTML, CSS, and JavaScript for personal and freelance projects.
- Create animated presentations and explainer-style content using Powtoon.

SELECTED DESIGN & DEVELOPMENT PROJECTS

DGATE: Disbursement Gate — Paynamics Technologies Inc.

Contributed to the enhancement of a payment and disbursement platform supporting merchant fund-disbursement workflows. Worked on APIs, services, back-office functionality, integrations, troubleshooting, and feature enhancements using C#/.NET, SQL, and web technologies within an Agile development environment.

HappyHands: An Interactive AR-based Nursery Rhymes and Mini-games Collection for Kindergarten Students

Capstone project: Developed an Augmented Reality educational game using a markerless algorithm, with Unity 3D and C# as the primary development technologies. Designed interactive nursery rhymes and mini-games for kindergarten students.

CustomEyes: Development of an E-Commerce Website

College project: Developed an eyeglass e-commerce website using ReactJS, HTML, CSS, and Bootstrap, with threat detection and analysis considerations integrated into the project.

EDUCATION

Bachelor of Science in Information Technology, With Distinction

Technological Institute of the Philippines — Quezon City | Graduated September 2023

AWARDS

- 2021–2022 President's List Academic Scholar — Second Semester, Technological Institute of the Philippines
- 2020–2021 VPAA's List Academic Scholar — Second Semester, Technological Institute of the Philippines
- 2020–2021 VPAA's List Academic Scholar — First Semester, Technological Institute of the Philippines

ADDITIONAL EDUCATION

- Our Lady of Fatima University — Senior High School, completed 2019
- San Jose National High School — Junior High School, completed 2017
